

Neo-Pure IW2 Ice Wand

Institutional/Commercial Filtration Applications

Standard Features

- The Ice Wand™ is being used in ice machines like Hoshizaki, Scotsman (aka Aquabullet), Ice-O-Matic, and Manitowoc
- The Ice Wand™ media imparts NO taste and odor on the treated water
- Since ice cube machines are programmed to discard the recirculating water on a periodic basis, the exposure of the discarded water to the Ice Wand™ will also help keep the drain tube clean and prevent it from clogging
- The Ice Wand™ is immersed directly in the water sump located inside the ice cube machine. As the water circulates through the distribution system, it is exposed to the Ice Wand™, thus keeping it clean in one simple, easy step
- The Ice Wand™ requires no special handling. A used Ice Wand™ can be safely disposed of in the normal trash
- The patented media used in the Ice Wand™ contains natural anti-microbial properties, which dramatically minimize the expensive, labor intensive, and time-consuming maintenance requirements of ice machines.

Applications

- Restaurants
- Bars
- Hotels
- Hospitals
- Convenient Stores
- Bakeries
- Pizzerias

USA MADE

Product Specifications

Diameter

1.25"

Length

7.75" (6.25" without the "hook" cap)

Media

Silver and copper anti-microbial media

Replacement Frequency

- ~ Every three months in an ice cube machine of less than 1,200 lbs. daily capacity
- ~ Every six weeks in an ice cube machine with greater than 1,200 lbs. daily capacity
